Basics of LNG

In brief | In detail

Length: 30 min. 55 visit(s)

This module discusses the basics of the liquefied natural gas (LNG) supply chain. Through a case study with two fictitious countries you will discover the basic principals of LNG production, shipping and import / export.

This module will take between 20 and 30 minutes to complete.

Experience

“No Big Bang, but raindrops”

Challenges:

- Support of all parties involved;
- Seeing it as one programme.

Successes:

- Development of 9 online modules;
- Development of first blended courses:
 - Two-year talent development programme;
 - Mini MBA;
 - Specifics course LNG;
- Development of online course for Partner.
